

Indoor unit model name SRK15ZS-WF, SRK20ZS-WF, SRK35ZS-WF Outdoor unit model name SCM41ZS-W

Refrigerant	R32	GWP		675
		0		
Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would				
contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This				
appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1kg of this refrigerant fluid				
would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1kg of CO2,				
over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.
